(g) Memo dtd 21 Mar 53 for Col White fr SA/DDA, same subject

In consideration of the memorandum dated 21 March from [redacted] on this same subject, a review of the referenced material, and as a result of a personal inspection of the area, I have determined that there was in fact an error in the staff study dated 11 August, Reference (a). There is not a relationship between the relocation of the fence as proposed and the elimination of two interior guard posts. I have recommended that these two interior posts not be eliminated. I have discussed this matter with Mr. Wolf, and he has directed that we not make the expenditure involved in the movement of the fence and that this subject be closed.
